The Monza range of Automotive leather is manufactured to stringent Nolan and automotive OE specifications for the Australian market. Using state of the art equipment in one of Italy's leading tanneries, Monza leather combines quality raw hides and the environmentally friendly "wet white" tanning process for a high quality finish. Monza leather has a history of proven performance and sets new standards for quality and comfort.

KEY PRODUCT FEATURES

- ✓ *UV stabilised*
- ✓ *High abrasion resistance*
- ✓ *Soft handle*
- ✓ *Environmentally friendly tanning process*
- ✓ *Stringent quality control*
- ✓ *Supported by the Nolan Warranty*

CONSUMER GUIDE

Features of Automotive Leather

Leather or indeed any material used in an automotive seating application is subject to high levels of wear and tear. The car interior can be exposed to extremes of temperature, and high levels of Ultraviolet light.

For these reasons, auto manufacturers have developed very tough specifications for leather used in cars. Compared to similar upholstery leather, the hides are thicker and have enhanced levels of finishing and surface treatment. Unfortunately, there is a trade-off between softness and durability. Automotive quality leather tends to feel stiffer than upholstery grade, which is sometimes interpreted mistakenly as an indication of poorer quality. Nolan leather meets the specifications of all Australian, European, Japanese and US auto makers. You can be confident that this leather will last the distance.

Leather is a natural product and requires regular care and maintenance to maximise its potential life. Available through Nolan Warehouses is a leather cleaning and conditioning kit specifically developed for automotive leather.

Leather Cleaning Kit

Suitable for Monza leather

Part # 09 LEA LM150

MONZA LEATHER – PRODUCT DETAILS

Colour	 Black	 Coal	 Graphite	 Mist	 Storm
Part #	09 AUT BLA	09 AUT COA	09 AUT GRA	09 AUT MIS	09 AUT STOR
Colour	 Dove Grey	 Ice White	 Creme	 Oyster	 Stone
