

Let the weather work for you

LET THE WEATHER WORK FOR YOU

Weather can be a major hindrance to profitability; especially in the hospitality industry. Whilst rain can really dampen patronage numbers, you can now use the weather to your advantage.

Orchestra MAX is part of the Dickson® range of awning fabrics. It features an innovative treatment, where rainwater can assist with the cleaning process. See video below for more details.

Orchestra Max differs from the standard range on account of its transparent and impervious coating on the underside side, which provides outstanding water resistance. Ideal for fixed and permanent installations located outdoors (awnings, pergolas, etc.), Orchestra MAX guarantees long-term colour fastness and excellent protection against both UV rays and inclement weather, coupled with easy maintenance.

Limited colours apply, however full range coming soon. Be sure to watch this space.
