

Vytex Fabrics

Care & Maintenance Guide

Vytex upholstery fabrics are designed for ease of maintenance providing years of service.

Following this Care & Maintenance guide regularly will enhance the life expectancy and maintain the fabrics original appearance.

General Cleaning – Regularly clean fabrics with a solution of mild soap and water using a soft cloth or towel. Rinse thoroughly with fresh water and wipe dry.

Spot Cleaning – Spills and general marking is inevitable in a commercial environment. Prompt attention to the affected area will minimise the chance of staining or fabric degradation. If a stain cannot be cleaned using the general cleaning instructions, clean the affected area with a solution of 30% methylated spirits and 70% water. Rinse thoroughly with fresh water and wipe dry.

Disinfection – In some commercial environments such as healthcare, it is necessary to disinfect the upholstery surface. When required, clean the fabric using the general cleaning instructions then using a solution of 10% bleach and 90% water, wipe the surface for a second time. Rinse thoroughly with fresh water and wipe dry. Constant cleaning using this method may affect the fabrics life expectancy.

- NOTE**
- *Do not use abrasive cloths or cleaners.*
 - *Do not use aggressive cleaners or chemicals.*
 - *Do not use vinyl conditioners such as ArmorAll.*
 - *When in doubt contact your local Nolan.UDA branch for further advice.*
